

WHEN IT COMES TO TOWER CONSTRUCTION,
we're beneath you 100%

Anchoring towers requires strong, steadfast support. Not just the kind provided by high-quality, durable products and systems that keep towers standing firmly in place for decades. But the kind delivered by people with the expertise and commitment to help complete your project on schedule and on budget.

At CMC Anchoring Systems—formerly known as EDSCO Fasteners—our team boasts more than 40 years experience building tower projects of all kinds. As the industry's premier provider of custom-fabricated anchoring solutions, we've set the standard for quality, reliability, and responsive service across the T&D and Telecom sectors. From projects with aggressive timelines to complex infrastructure installations, CMC delivers anchoring systems engineered to perform—and built to last.

CAPABILITIES

- In-house galvanizing at all major facilities
- Roll & cut threading, smooth & deformed bar
- Precision HD plasma burning up to 2" plate thickness
- Certified welding (AWS D1.1/D1.4)
- Short lead times / rapid delivery

WHY US

1 LOGISTICAL ADVANTAGE

With four manufacturing locations across the U.S., CMC Anchoring Systems minimizes transportation costs, ensures regional supply reliability, and delivers industry-leading lead times.

2 INDUSTRY LEADING SERVICE

CMC Anchoring Systems delivers unmatched service built on AISC-quality standards, nationwide production capacity, and a legacy of responsiveness. We provide dedicated support before, during, and after every project, with 24-hour in-field response, flexible manufacturing, and a focused commitment to anchor bolt foundation cages.

3 IN-HOUSE MANUFACTURING

By keeping every stage of production under one roof—from fabrication to galvanizing to final assembly. CMC ensures strict quality control, precision, and consistency. Our advanced fabrication technology and one of the largest raw material inventories in the industry enable unmatched efficiency and responsiveness.

4 EXPEDITED EMERGENCY ORDERS

We understand the critical nature of infrastructure timelines. Our agile production model and nationwide footprint allow us to fast-track emergency orders and meet urgent project demands with speed and precision.

Reliable anchoring for T & D power towers, ensuring stability across various terrains.

UTILITY TRANSMISSION

Fast, secure foundations for 5G and telecom towers with minimal site impact.

COMMUNICATIONS

Custom-assembled or loose, up to 18J bar, various grades.

ANCHOR BOLT CAGES:

Smooth & deformed, single/double end, bent.

ANCHOR BOLTS:

O U R M A R K E T S

O U R P R O D U C T S

LIGHTING

Durable, corrosion-resistant foundations that reduce maintenance and extend service life.

TRANSPORTATION

Quick-install anchors for traffic signs and highway structures.

HARDWARE:

Domestic & Imported, Nuts, washers, all grades and finishes.

FABRICATION:

Cut, burned, welded parts; embed plates; precast embeds; stud rails.

OUR TEAM OF PROFESSIONALS OFFER UNMATCHED EXPERIENCE

What our customers are saying

"CMC Anchoring Systems has the very best customer service in the industry. Fast, cooperative and helpful!"

— SENIOR VP OF OPERATIONS

"Because CMC has so many production facilities, they can service our projects really well. They even pull forward orders when needed."

— MATERIAL SUPERVISOR

"With CMC, I've worked for 26 years without a single issue. They're experts in both T&D and telecom."

— ENGINEERING MANAGER

"There's no question about CMC's quality. The cages arrive, get inspected, and go straight into the ground."

— PURCHASING MANAGER
